

CARNEGIE INSTITUTION OF WASHINGTON  
DEPARTMENT OF GENETICS  
COLD SPRING HARBOR, LONG ISLAND, N. Y.

June 6, 1956

Dear Dr. Lederberg,

Thank you very much for  
your informative letter of June 1st.  
It helped clarify several points  
of experimental fact which were  
not previously clear to me.

Also, your advice on the writing  
of the paper is well taken. The use  
of the term, transduction (in all its  
forms), has and will continue to  
be performed with as much discretion  
as I can engender. Your point of  
view on its usage is clearly stated  
early in the article.

I am looking forward to  
a discussion with you at Baltimore.

Sincerely yours,

Philip E. Hartman
